

## Wireless communication Guard Tour GS-6000E

### Features:

- Ease of use: Press switch button when reading data, no need to touch and never be worn. Sound and light prompt when reading successfully.
- Unless communication port: No socket with probe case, Update data with communication station.
- Low tiny-power consumption: very low static state electric current a group of high power 3.6V Lithium Batteries. And it could read the card at least 500 thousand times.
- Digital display: Intelligent LCD shows current time and Card's ID number.
- Large memory: 4MB Flash memory, 30thousand data, lose power can keep the data.
- The quality of solid: It water proof and shake proof, resist low temperature, compact appearance, no trouble.
- Professional design: Modern appearance, top grade feeling.

### Specification:

<b>Model:</b>	<b>GS-6000E</b>
Card Type:	125kHz EM ID Card
Influence Distance:	0~6cm
Record Capacity:	30,000 records
Working Temperature:	-40°C~70°C
Ambient humidity:	0~95%
Dimension:	144×46×26mm
Weight:	200g
Power:	3.6V Lithium Batteries
Protection of shell grade:	IP54 /IP67
